I build AI systems that actually work — from WhatsApp expense trackers to hallucination detectors. CS undergrad at LPU, skilled in Python, NLP, and Generative AI. Looking for an AI/ML or SDE internship to solve real problems at scale.

Internship

Software Development Engineer (SDE) Intern

Jan 2026 - Feb 2026

Bluestock Fintech.

- Developed and improved software components for fintech-based applications with focus on debugging, backend workflows, and clean code practices.
- Solved real-world engineering tasks involving logic building, API handling, and data processing.
- Collaborated with senior developers to understand software architecture, development pipelines, and scalable engineering practices.
- Gained exposure to secure financial systems, software testing, and production-level development workflows.

Projects

AI-Powered WhatsApp Expense Tracker | Python, n8n, Twilio, Webhooks, Prompt Engineering

May 2026

- Built an AI-powered personal finance assistant that enables users to log expenses directly through WhatsApp using natural language.
- Integrated Twilio WhatsApp Sandbox with n8n automation workflows for real-time message processing and automated replies.
- Developed an AI extraction pipeline to convert unstructured messages into structured transaction data including amount, category, merchant, payment type, and date.
- Implemented JavaScript-based validation logic and automated cloud storage using Google Sheets API.
- GitHub Repository: <https://github.com/shokinw/AI-Powered-Whatsapp-Expense-Tracker>

AI Hallucination Detection System | Python, spaCy, Transformers, Scikit-learn

April 2026

- Developed an NLP-based system to detect hallucinations, misinformation, and biased claims in AI-generated content.
- Implemented semantic similarity and fact verification using transformer embeddings and cosine similarity techniques.
- Built sentiment and bias detection modules to identify toxic language, subjective statements, and unsupported claims.
- Generated explainable AI reports with confidence scores, reasoning analysis, and bias indicators for safer AI outputs.
- GitHub Repository: https://github.com/shokinw/Hallucination_Bias-NLP-Model

Certificates

Computational Theory: Language Principle & Finite Automata Theory

August 2025

Infosys — [Certificate Link](#)

Essentials Automation Certification

Dec 2025

Automation Anywhere — [Certificate Link](#)

Technical Skills

Programming Languages: Python, C++, JavaScript

AI/ML & Data Science: TensorFlow, Keras, Scikit-learn, Pandas, NumPy, OpenCV, Transformers, Hugging Face.

Generative AI & Agents: LLM Integration, Prompt Engineering, RAG, Semantic Similarity, Explainable AI, CrewAI.

Backend & APIs: FastAPI, REST APIs, Webhooks, API Integration

Automation Tools: Docker, n8n, Automation Anywhere, Blue Prism, Git, GitHub

Core Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOPs), Deep Learning, NLP, Computer Vision, OCR, Workflow Orchestration.

Soft Skill: Problem Solving, Communication, Adaptability, Cross-functional Collaboration.

Education

Lovely Professional University Punjab

2023 – 2027

Computer Science and Engineering | CGPA: 6.25/10

Jalandhar, Punjab

Bharti Vidya Mandir Higher Secondary School

2020 – 2023

12th with Science | Percentage: 78%

Kishtwar, Jammu & Kashmir
